What is WeCook?

WeCook is a cooking app tailored to the individuals who want to personalize their eating needs and discover new ways of eating healthy. This app is for people who want to take control of their diet, discover new recipes and possibly expand their options for cooking. It achieves this goal through two primary functions, the Meal Plan and the Digital CookBook!

Why use WeCook?

In this day and age, an average person may find it increasingly difficult to maintain a proper healthy lifestyle. Complications may occur that make it easy to forget to take care of your health. We plan to help with one of the major components of a healthy lifestyle - diet. So create an account today and gain control over your health and future!

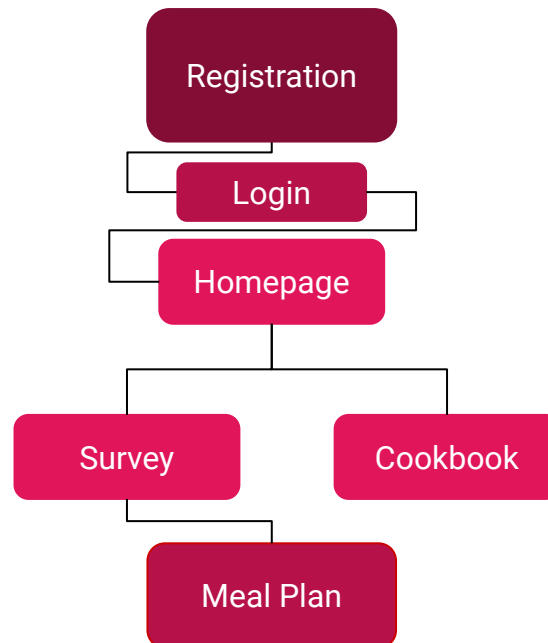

Features

Meal Plan: This feature will give the user a meal plan to follow based on their personalized profile.

CookBook: The Cookbook is where the user's recipes will be stored between personal recipes to saved favorite recipes from others.

Survey: Upon completion of the first time login process, our goal is to prompt users with an approximately 10 question survey that will find out their tastes, preferences and meal restrictions, and recommend a basic meal plan based on that.
