Purpose

WeCook was created to help people on their health journey to a better self. It is an app tailored to achieving a healthier diet based on an individual's personalized needs. Here's an example of what the app addresses.

User Problem

Daunting task of searching the web for specific recipes that fit your personalized needs

No way to organise and keep good recipes, keep having to re-look for a recipe on the web

Difficult and time consuming to find recipes for a weekly meal planning

WeCook's Solution

Easy to find recipes that contain key ingredients and consider dietary restrictions

Login and personalized account to store all your favourite recipes so you'll never lose a good recipe again

Generate a weekly meal plan at a touch of a button

New Integrations and Additions

- More defined and User-friendly recipes page

- Meal plan generator

- User information

- Add a recipe

- Contact Us Page
